

the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. with the law as it is I am less harrass by telephone sales person calling from 8am until 10pm everyday I use to get Around 50 calls a week since the new law I might get 2 calls from a sales person ! my veiw is if you lessen the laws these people will drive people crazy thats why I want the law to stay as is unless the law changes to better me ! In other States you can't harrass people after business hours but here they call all hours don't mess up a good thing !!!!!
